

## COMMENT CARD

# South Delta Improvements Program

Date: 10-27-02

Thank you for attending today's meeting and participating in the scoping process for the South Delta Improvements Program. The purpose of the scoping process is to seek early public input regarding alternatives, concerns and issues to be addressed in the Environmental Impact Report (EIR) and Environmental Impact Statement (EIS). The scoping process also helps to identify project impacts, alternatives, mitigation measures, and environmental subject areas to be addressed.

(please print)

Address: 12752 PLATT RD  
City: TRACY State: CA Zip: 95304

☒ Yes, I would like to be added to your mailing list to receive newsletters, information mailings, and meeting notices.

Please note which issues regarding the project you would like to see addressed in the EIR/EIS, and any other issues related to the scoping process.

☐ I wish to withhold by name and address from public disclosure.

- ① TOO MUCH WATER IS ALREADY BEING 'dispersed'
- ② TOO much emphasis placed on fish quality of life.
- ③ Barriers cause stagnation of H<sub>2</sub>O
- ④ Tax dollars should not be used to help H<sub>2</sub>O exporters profit when many in the area suffer from the lack of flushing rivers by diversion to So Cal as opposed to flowing to Bay
- ⑤ Barriers strategically located to control water that many of us have senior right to use
- ⑥ Delta Smelt not in decline
- ⑦ Best option is dredge channel

Thank you for participating in this important process. Please submit this form to a project representative by October 31, 2002, to ensure that your comments are considered for the EIR/EIS. If mailing, please send to: Mr. Paul Marshall, California Department of Water Resources, Bay-Delta Office, 1416 Ninth Street, P.O. Box 942836, Sacramento, CA 94236-0001
